- Hand Pull Start
- Multiple Controls

SMART CURTAIN MOTOR

High Precision Motor

Ultra Quiet Design

Constant Torque Drive

Safety Load Up To 60 Kg

Hand Pull Start

Intelligent Design

WiFi

IR Remote

Mobile App

ULTRA QUIET DESIGN

Three patented technologies are used inside the motor and the noise can be as low as 22dB. Use of leading intelligent designs and soft start and stop functions like advanced elevators, make the opening and closing of the curtains lighter and quieter.

PULL START FUNCTION

When the power is on, gently pull the curtain around 10cm in one direction and the curtain will automatically open or close based on the direction of the pull.

MANUAL FUNCTION

The mechanical power structure releases the function of pulling when the power is off. So it can be pulled manually to open and close just like any other normal curtain.

INTELLIGENT DESIGN

The opening and closing stroke points are automatically set, and the best stop position can be easily reserved and memorized to protect the components from noise or damage due to collision and prolong the service life of the system. After the power is off, the stroke has a memory function and an intelligent design.

WORKS WELL WITH

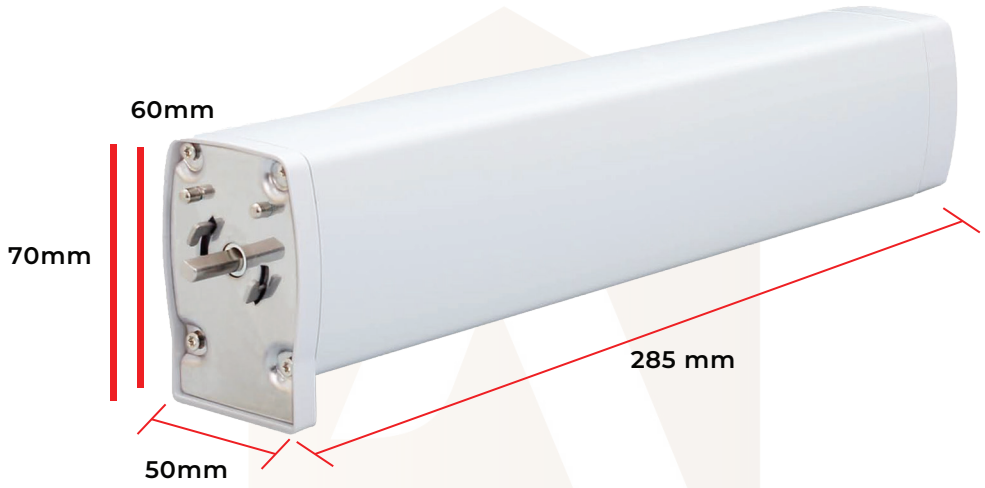

Alexa

Google Assistant

Siri

Google Home

PRODUCT SIZE

TECHNICAL SPECIFICATIONS

Motor

Rated Torque: 1.2Nm

Opening And Closing Speed: 14r/cm

Rated Power: 110-240W

Control Modes: WiFi, IR Remote & Mobile App

Noise Level: <22dB

Supports: Alexa

Dimensions: 285 x 50 x 70mm

Remote

Transmit Channel: 433 RF Transmitter, 1 remote controls 2 motors

Battery: CR2430 Button Battery

Manufactured & Marketed By
