RGBW / DIMMER CONTROLLER

RGBW / Dimmer Controller is a device that automates your existing RGBW and regular led strips. It is a controller with which you can control the colours and 0 to 100% dimming of the lights from anywhere in the world. You can create customized colour settings, scenes or brightness for a particular ambience or mood along with various patterns. You can create a variety of moods and schedule them according to the workflow that you created for other smart devices in the house.

FEATURES

Retrofit Design: Designed to blend in with the present interiors near the strip lights.

Robust Hardware: Advanced firmware and rugged hardware design for long-lasting performance.

16Million Colours: Choose from 16 million shades to create personalised patterns.

Dimming: Choose from 0-100% dimming range to create personised patterns.

Secure Wi-Fi: Equipped with secure WiFi that controls appliances from anywhere.

Timer And Schedules: Set cut off timer, so that the lights will be turned off on the given time.

Workflow And Scenes: Easy to create workflows as the controls are based on the schedules and timer settings.

Voice Command: The automation app is compatible with all types of voice assistants such as Alexa, Bixby, Google Assistant, Siri and more.

IFTTT: Extend unlimited capablities with IFTTT like location-based control etc.

TECHNICAL SPECIFICATIONS

Power Input: 12 ~ 24V DC (Mobile adapter)

Output: 12V, 24V DC

Connector: A 5-pin male connector is included in the box (Type + RGBW)

Typical Standby Power: < 1W
