

SMART PLUG

With the AASKIN Retrofit Smart Plug, turn any appliances such as AC, Geyser, TV and more rated up to 16 A into a smart appliance. It is a device that is enabled with WiFi and allows you to connect heavy duty home appliances to the AASKIN Smart Home Network and control the devices from anywhere in the world remotely from your smartphone or tablet. It contains power measurement circuit for dynamic power measurement, inbuilt surge protector and ceramic housing for electrical protection.

FEATURES

Retrofit Design: It can be plugged into any 16 A Indian Socket.

Robust Design: Advanced firmware and rugged hardware design for long-lasting performance.

Secure Wi-Fi: Equipped with secure WiFi that controls appliances from anywhere.

Voice Command: The AASKIN app is compatible with all voice assistants such as Alexa, Bixby, Google Assistant, Siri and more.

Surge Protection: The Smart Plug can detect low and high voltages and accordingly cut off the power supply.

Timer: Create a timer to cut off the power supply after a certain amount of time.

Workflow And Schedules: Create schedules and workflows so that you don't have to touch your smartphone or give a voice command.

Monitor Power Usage: You can monitor how much power a particular appliance consumes and use it accordingly.

TECHNICAL SPECIFICATIONS

Power Input: 240V AC, 50/60Hz

Total Power Input: 16A

Maximum Resistive Load: 2500W

Maximum Inductive Load: 1000W

Typical Standby Power: <0.8W

Maximum Current Per Channel: 16A

Power Measurement Accuracy: ±5W

Operating Distance From Wi-Fi Router: upto 30 m (depends on the router and its placement)

Operating Temperature: 0° to 70° C

Number Of Channels: 1

Relay Channel: 1

Socket Type: Indian Model

Plug Type: Indian 16 A Model

Dimensions: 61.8 mm x 99 mm x 42 mm

Pin Standard: BS 546 Type M (Indian Standard large three-pin)

Socket Standard: BS 546 Type D & M Combo (Indian Standard large and small three-pin)

Communication Wi-Fi: Connects to 2.4 GHz, Wi-fi 802.11/b/g/n

AASKIN Smart Plug is a compact device that can be used anywhere. You can use it even while travelling and configure the device within minutes. All you need to do is plug in the device, switch on the socket and click on the button of the smart plug and you are ready to configure the device. With the voltage detection feature and the ceramic socket inside the device, it is the ultimate portable smart device that will help you automate any appliance on the go.
