CURTAIN TRACK EXTENSION METHOD

STEP 1

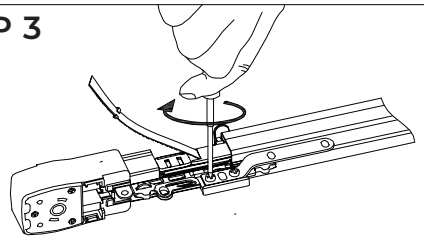

Extend the track to the length you need

STEP 2

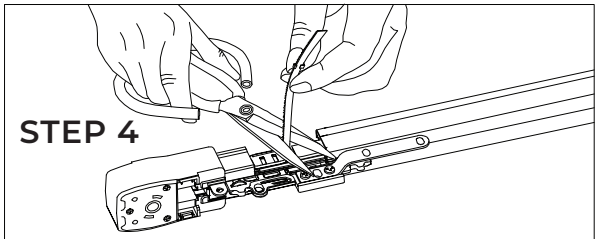

Shorten the track by pulling back
the belt in direction of the idler unit

STEP 3

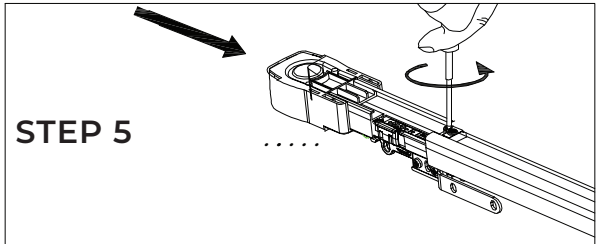

Screw the carrier on the side to cut the belt

STEP 4

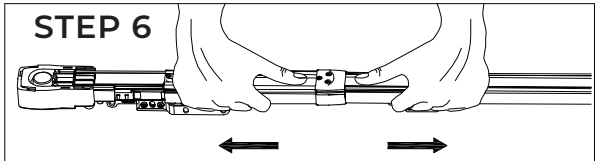

Cut the extra belt

STEP 5

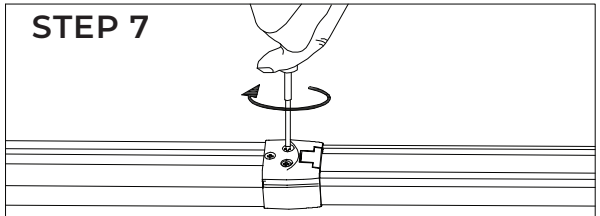

Take off locker between idler unit and outer
track & push idler unit close to outer track

STEP 6

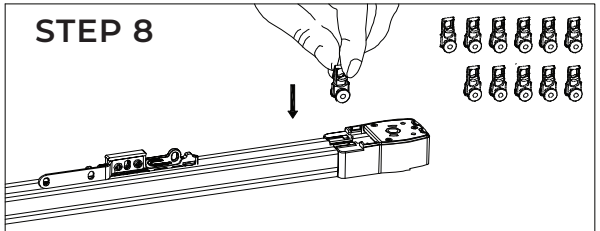

Extend the track until there is
tension in the belt

STEP 7

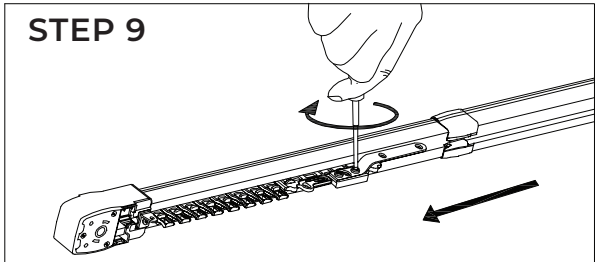

Screw the back side of the track joiner

STEP 8

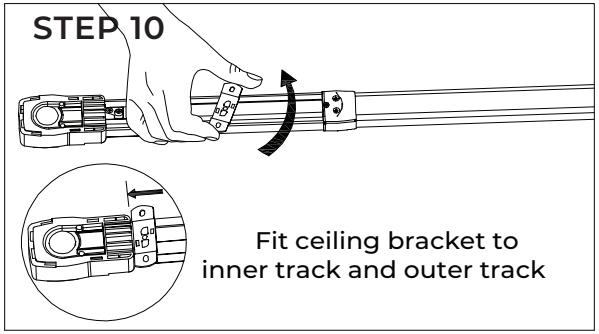

Put runners on track, then fit the loop
stop on the idler unit

STEP 9

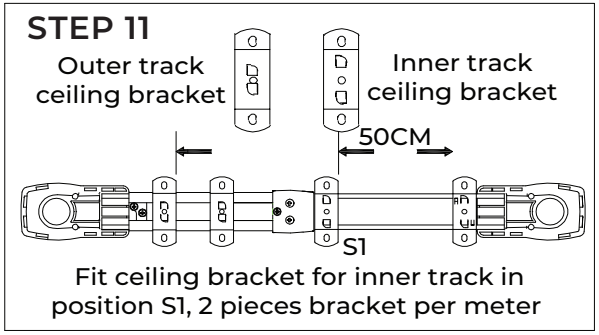

Move adjustable carrier to another end side,
screw the carrier

STEP 10

Fit ceiling bracket to
inner track and outer track

STEP 11

Fit ceiling bracket for inner track in
position S1, 2 pieces bracket per meter
